Projects

Professional Landing

Developed a React app with Vite and **custom server-side rendering** for SEO and performance optimization, including a theme with SSR support.

Clock

Built a clock application with React, featuring alarm, timer, time zones, and stopwatch functionality, with a strong focus on **date manipulation** and handling.

ABOUT

I am a **Front-End Engineer** with over three years of experience specializing in platform development and building scalable web applications. With a deep understanding of **React.js** and expertise in **custom SSR solutions**, I focus on delivering high-performance products. I excel at taking projects from concept to completion, ensuring efficient and scalable solutions.

Experience

Raiffeisen Bank | Front-End Engineer

Apr 2024 - Present | Remote

- Reused 70% of business logic to expand the internal chat platform, **saving six months** of UI development time.
- Enhanced platform performance by 30% while adding new features and maintaining scalability.
- Independently developed and **integrated a micro-frontend** for a large-scale platform.
- Designed the build process and implemented **CI/CD pipelines**, reducing build times by 40%.

Toolkit | Front-End Engineer

Mar 2023 - Mar 2024 | Remote

- Designed and architected three applications for the **warehouse management system** from scratch, including both business logic and application structure.
- Identified and implemented the right level of abstraction to support project **scalability** and future extensions.
- Achieved and maintained **100% test coverage** while ensuring ease of project expansion.
- Enabled **40% faster workflows** for warehouse users by improving application usability and functionality.
- Successfully migrated significant warehouse operations to the new system within **three weeks** with minimal disruption.

GCode | Front-End Engineer

Nov 2021 - Feb 2023 | Remote

- Collaborated with a team of six developers to build and optimize a **VPN service** with seamless API integration and a user-friendly interface.
- **Improved code quality** and **reduced development time by 35%** through the implementation of best practices and collaboration with senior developers.
- Supported a growing user base, achieving over **1,000 active users** in a startup environment.
